Subject: opposition to dump

01

This is a note to tell you that we are against putting nuclear waste in Nevada. We were born and raised in Lincoln County and still own our home there. If there is nothing wrong with nuclear waste, why not leave it where it is!!! If you transport this material clear across the United States, it looks like the chances for a disaster is always there. I for one have seen how sick people get when they get cancer as both of my parents had it and are no longer with us. You need to think of all the dangers of this material! Any life is worth saving!
Thank you for your time,
Donna and Vaughn Phillips
